"1st trial with Nutrilick is when I buy 2 sachets at the store during the catshow. Then, I buy 1 box for my cats at home. They were so excited & fight with each other to eat it as it wasn't enough. The big thing that I saw that their fur is shining, like they are so healthy & that is why I use Nutrilick as the supplement".

Loki no longer needs to take various types of medicine because he is always healthy, alhamdulillah. At the same time, it also reduced Loki's medical costs. Thank you, Cat Candy's NutriLick”.

Leo

Domestic Long Hair

“Leo is a very picky eater. I've given him wet food, kibbles, and other brands of candy, but he's rejected them all. But the first time I gave him Nutri Lick, he loved it! He doesn't care what flavor it is, he loves them all. And because of Nutri Lick, he's also more responsive to my commands. When he hears the sound of the sachets, he runs towards me with his belly wagging”.

Chopee

Domestic Medium Hair

"I have been using Nutri Lick since I adopted my cat, Chopee, in December 2021. When I first got Chopee, he was in poor condition. He had fungus on his face, his fur was thin, and he was not very active. After one month of using Nutri Lick, Chopee started to show improvement. The fungus on his face cleared up, his fur grew back, and he became more active. He also gained weight. Now, Chopee has gone from a "sad cat" to a "happy cat" and is thriving".
